SPRAY SUPPRESSANT

Spray suppressant brush is suitable for dust and water spray protection on truck bodies, herbicide or chemical spray heads and many more applications where dust, debris or liquid spray needs to be contained.

When used on truck and trailer bodies the brush directs water and dust back to the road surface below the windscreen level of other traffic and away from the truck's mirrors.

RIGID BACK STRIP BRUSHES

Stainless Steel Rigid Back straight strips 3000mm in length with a variety of bristle lengths. Rigid Back Strip Brushes can be manipulated in the factory to form a curved brush for use on truck or trailer mudguards.

HARD POLY BACK AND FLEXIBLE BACK STRIP BRUSHES

Hard Poly Back and Flexible Back Strip Brushes are made by fusing high quality brush filaments into an extruded 8.0mm wide poly backing making the filaments become one with the backing. These brushes won't corrode as they are constructed entirely without the use of any metal parts.

Hard Poly Back Strip Brushes are made in 3mtrs lengths where as Flexible Back Strip Brushes are available in continuous lengths. This type of brush is ideal for forming around uneven or non parallel surfaces.
